A bar chart showing the weight of primary tumor (mg) for three groups: Control, B, and A. The y-axis is labeled 'Weight of primary tumor [mg]' and ranges from 0 to 25,000 in increments of 5,000. The x-axis labels are Control, B, and A. The Control group has the highest tumor weight, followed by B, and then A. Error bars are present for each group.

Group	Weight of primary tumor [mg]
Control	~24,000
B	~21,000
A	~6,000
